

TR-069 AND DOCSIS IN HARMONY

DOCSIS TR-069

FLEXIBILITY

Axiros' Axxess ACS opens a whole new world of possibilities. Our ACS equipped with world leading TR-069 support is your bridge for high quality services at the customer's premises. The Axxess ACS offers an open platform to support a wide range of devices (e.g. routers, set top boxes, phones etc) and is the base for your Next Generation Network.

Seamless Integration:

Axiros' Axxess ACS integrates on top of your cable modem infrastructure thus protecting your investments.

Zero Touch Configuration:

Plug and play for your subscriber's CPEs. With TR-069 your customers don't need to tackle error-prone configuration procedures on different CPEs that are necessary for delivering new services.

Subscriber Value:

Improve your customer's satisfaction through easy access to your services, faster error correction and proactive service quality monitoring.

Security:

The Axxess ACS helps you to securely separate the services of your subscribers. No service sharing and unwanted service usage between subscribers or third parties.

Know How:

Axiros offers great in depth know how in device management as well as in the integration of TR-069 into DOCSIS environments.

TR-069 AND DOCSIS – AXIROS COMBINES THE BEST OF TWO WORLDS. THE RELIABILITY AND PROOFEN CAPABILITY OF DOCSIS FOR MANAGING CABLE MODEM INFRASTRUCTURE AND THE FLEXIBILITY OF TR-069 TO MANAGE A WIDE RANGE OF CPEs.
