any service

EFFECTIVE DEVICE MANAGEMENT MEANS:

- Generic Management of any device: IADS, routers, STBs and smart home - within one management system
- Unified IP Service Provisioning: Synchronizing provider based central business logic to the field
- Self Service Portals: Provide self-provisioning and self-help on the Internet and on mobile handsets.
- Managed Business Services: Achieving business agility through service aware automated workflows
- QoE Monitoring: Real-time monitoring of quality of customer experience
