

AXIROS SOLUTIONS – MONITOR QUALITY OF EXPERIENCE (QoE) DIRECTLY ON MILLIONS OF DEVICES

For the first time available:
QoS / QoE Monitoring via TR-069 – Fully Transparent to the ACS

EFFECTIVE QUALITY MONITORING MEANS:

- Real-time AND historic service quality information for voice, video and data services
- On-device parameter aggregation with unmatched performance, for millions of devices
- Integration within your existing OSS/BSS, for direct service-awareness of your monitoring processes
- 100% compliancy to open standards, for a hassle free deployment
- Guaranteed interoperability with any TR-069 device / any TR-069 ACS
- Consolidated drill-downs on service quality, for first-line support, network, marketing and management
- Massively reduced truck rolls, first line support minutes and therefore operational expenditures
